Keep students focused with tools that teachers love

School-issued devices can help students expand their learning by providing access to the internet's virtually limitless resources. But this same capability introduces new distractions and challenges. It's hard for teachers to know if students are engaged in their lessons or the latest viral video.

Securly Classroom helps teachers regain control of their classrooms by showing them exactly what their students are seeing. If students are distracted during a lesson, teachers can close tabs and block sites if necessary. On top of that, Securly Classroom integrates deeply with the tools teachers already know and love, like Google Classroom and Canvas. When teachers no longer need to worry about what students are doing, they can focus on what they're really there to do: teach. And instead of a barrier, technology becomes a bridge. You can enable your teachers to communicate directly with students, share links to helpful resources, and deliver more engaging lessons.

With Securly Classroom, you can:

- Minimize distractions to keep students engaged in learning
- Push lesson content directly to student screens, so they get the most out of class time
- Connect and communicate with students in new ways, whether in-person or remote

"Having the ability to see what students are doing on school-issued Chromebooks during instruction time is very beneficial. And having the capability of locking their screens to one URL is mind blowing, especially for online test taking. Securly Classroom is a solution that our district will continue to utilize for years to come!"

Denise DeJuliannie, Technology Director
Eden Valley-Watkins School District

How Securly Classroom Works

Screen Lock

Freeze screens and get your class's attention by sending a custom message (e.g. All eyes up front, please) then release individual students or the entire class at once.

Site Lock

Open and lock students to a particular website or set of websites, blocking others.

Push URL

Quickly push web pages to individual students or your entire class.

Share Screen

Share your desktop, a single tab, or an application with one student or your whole class, as well as audio remote students.

Announce

Send a message to all student advices that they must acknowledge to close (e.g. Reminder: Big test tomorrow!).

Unlock

Release individual students or the whole class from Screen Lock or Site Lock.

Get in Rhythm

Offer daily emoji based student wellness check-ins.

Groups

Click on the groups icon to create and display student groups.

Change View

You can now adjust how you view students screen and choose from Card View, Tab View and Rhythm View.

Zoom In/Out

See more students at once, or more detail.

Session Options

Add blocking plan and adjust student communication settings in an active class session.

The screenshot displays the Securly Classroom interface for a class titled "3rd Period Algebra 2". At the top, there is a navigation bar with icons for Screen Lock, Site Lock, Push URL, Share Screen, Announce, Unlock, and Get in Rhythm. A "Class ends: 47:08" timer and a settings gear icon are also visible. Below the navigation bar, there is a "Select Students" dropdown and a "Card view" dropdown menu. The main area shows a grid of student cards. Each card displays the student's name, a thumbnail of their current screen, and a status indicator (e.g., "+3" for online, "+4" for offline). A context menu is open over the card for "Keith Fork", showing options: Pin, History, Share Screen, Chat, Report with Observe, and Exclude from class. A zoom in/out icon is also visible in the top right corner of the student grid area.

Pin

Hone in on individual students if you want to keep a closer watch.

History

Quickly see a student's browsing history for that class session.

Chat

Communicate one-on-one with students and maintain logs of all chats.

Benefits

- Take the frustration out of device management, so you can focus on teaching
- Know what your students are doing on their devices during class
- Instantly push content and resources to student devices
- Lock student screens during tests and when their attention is needed
- Block unrelated and distracting sites to keep your students focused on the lesson
- Support students via virtual hand-raise and 1:1 text or voice/ video chat

Features

Easy Integration

Sync with Google Classroom, Schoology, Canvas, ClassLink, Clever, and any SIS that supports the OneRoster standard.

Cross Platform and Environment

Use with Chromebooks, Windows, and Macs, whether teaching in-person, remote, or in hybrid environments.

Screen Viewing

See and monitor each student's device screen, and open or close tabs from a single convenient interface.

Tab Control

See a list of all open tabs on student devices and close or block websites to keep students focused.

Blocking Plans

Want to use YouTube in one class, but find it a distraction in another? Create reusable lists of websites and Windows apps to block distracting sites for individual classes.

Raise a Hand

Give students the ability to get your attention or ask for help.

Class History

View a record of all student browsing history during class or after class.

Lost Chrome Device Recovery

Keep track of Chromebooks with tools to lock, locate, and communicate with missing devices.

Native Windows Agent

- On Windows, teachers can view the whole desktop during class, and remotely close Windows apps like they can with browser tabs.
- Classroom uses a native Windows MSI file and is not dependent on using a specific web browser or Google logins.

Admin Dashboard

Get valuable insights into your school or district's usage of Securly Classroom.

Live Connect

Allow teachers to connect 1-on-1 with remote students to provide assistance using full video, audio, and screen-sharing capabilities.

Combine Classes

Teach combinations of multiple classes in just a few clicks.

Student Groups

Customize instruction, curate content, and communicate effectively with different groups of students in the same class.

Student Password Reset

Enable teachers to help students regain access to their Google accounts by allowing them to reset students' Google account passwords through the Classroom interface.

Save Announcements

Allow teachers to communicate with their classes in just a few clicks. Teachers can view a list of previously sent announcements, and save announcements for future reuse.

Share block lists

Teachers can share block lists among themselves, and edit or copy block lists from their peers to allow for seamless collaboration.

Securly Classroom integrates deeply with other Securly products, as well as popular third-party tools that teachers everywhere already use daily.

Integrations include:

Allow teachers to directly manage hall passes through Securly Pass, minimizing class disruptions and saving valuable instructional time.

Enable teachers to easily document observations about students' health and safety and share the data with those who need it.

Make teaching (and IT administration) easier by letting teachers temporarily allow sites through Securly Filter – just for their class, only during that class session.

Easily direct students to wellness check-ins while running a class, then immediately identify students who need support and gain actionable insights into your school climate.

Teachers in districts that use Canvas will have an option in the Push URL and Site Lock tools to choose from assignments created in Canvas to push to students.

Teachers in districts that use Google Classroom will have an option in the Push URL and Site Lock tools to choose from assignments created in Google Classroom to push to students.

Empower teachers with powerful, user-friendly classroom management software

With Securly Classroom's intuitive tools at teachers' fingertips, you can allow them to minimize technology distractions and regain control of their classrooms.

Ensure students are focused, engaged, and connected, and give teachers tools that let them use their technology to the fullest.
